This project drew from Chalmers, D., et al., (2014). Australian University Teaching Criteria and Standards Project. [Final Report](#). Office for Learning and Teaching, Department of Education. Sydney: NSW. [CC-BY-SA 4.0](https://creativecommons.org/licenses/by-nc-sa/4.0/)

Design

Design and plan learning experiences (or systems of learning experiences)

Standards:

- **Mastery of subject area(s) or disciplines**
- **Thorough preparation of classes**
- Organization of class/course, preparation for classes
- Willingness to try different or new teaching methods and technologies
- Incorporation of teaching innovations into teaching pedagogy
- Teaching innovation in curricular design
- Extent to which scholarly work is brought into the classroom

This might look like:

- Alignment of quality learning outcomes, teaching strategies and assessment
- Knowledge of the student learning process
- Creation of learning resources to support student learning
- Use of technology to support student learning
- Content expertise

You might draw this type of evidence from:

- Peers
- Annotated and peer reviewed:
- Syllabi
 - Assessments (essay questions, project briefings, exams)
 - Learning Resources (slides, quizzes, videos, handouts, activity sheets)
-
- Evidence of adoption of techniques/approaches by others
 - Recognition from university, national or international peers

Design & Deliver

Develop effective learning environments and student support

Standards:

- **Willingness to respond to students' questions and concerns**
- Ability to stimulate student's interest
- Availability for students outside of class time
- Adequacy of support and direction provided to graduate students
- Fairness in dealing with students

This might look like:

- Provision of quality student support (including graduate supervision)
- Availability to students
- Creating an inclusive learning environment (students feel valued and able to contribute and engage)
- Connecting students to appropriate supports and services as appropriate
- Supporting students with diverse backgrounds and perspectives equitably
- Appropriately dealing with issues in student conduct (academic and non-academic)

You might draw this type of evidence from:

- | | |
|----------|---|
| Students | <ul style="list-style-type: none">• Student learning experience questionnaire outcomes• Student and alumni testimonials• Other forms of student feedback (formative, focus groups) |
| Peers | <ul style="list-style-type: none">• Peer testimonials• Peer teaching observation outcomes• Evidence of adoption of techniques/approaches by others• Recognition from university, national or international peers |
| Other | <ul style="list-style-type: none">• Evidence of change in practice (within and after a course) based on student feedback |

Deliver

Teach and support student learning

Standards:

- **Effective communication with students**
- organization of class/course
- appropriateness of material presented (i.e. volume, level, currency)
- clarity of communication
- ability to stimulate students' interest
- responsiveness to students' questions and concerns
- willingness to try different or new teaching methods and technologies
- incorporation of teaching innovations into teaching pedagogy

This might look like:

- effective facilitation of learning experiences
- clarity of content and learning process
- encouraging active participation of students
- explaining concepts in a way that students can understand
- helping students that encounter difficulty
- knowledge and use of a range of teaching activities and resources (including learning technology)
- utilizing a diversity of examples and resources (from different cultures, countries and contexts)

You might draw this type of evidence from:

- | | |
|----------|--|
| Students | <ul style="list-style-type: none">• Student learning experience questionnaire outcomes• Other forms of student feedback (formative, focus groups)• Student testimonials |
| Alumni | <ul style="list-style-type: none">• Alumni testimonials |
| Peers | <ul style="list-style-type: none">• Peer and/or co-teacher testimonials• Peer teaching observation• Adoption of techniques/approaches by others• Recognition from university, national or international peers |
| Other | <ul style="list-style-type: none">• Assessments of student achievement of learning outcomes• Student grade distribution• Graduate student time to completion• Examples of student work/theses (as evidence of student learning)• Evidence of change in practice based on assessment outcomes |

Deliver

Assessment and feedback to students on their learning

Standards:

- **Exhibit fairness in student evaluation**
- Fairness and adequacy of evaluation of students' performance

This might look like:

- Support for students in developing and demonstrating the intended learning outcomes for the course (through, for example, staged formative and/or summative assessment activities)
- Clearly stated assessment requirements and criteria
- Provision of constructive and timely feedback
- Design of assessment activities closely linked to course objectives
- Design of assessment tasks that build cumulatively toward learning outcomes
- Using student self and peer assessment approaches to support learning

You might draw this type of evidence from:

- | | |
|----------|---|
| Students | <ul style="list-style-type: none">• Student learning experience questionnaire outcomes• Other forms of student feedback (formative, focus groups) |
| Peers | <ul style="list-style-type: none">• Peer reviews of course assessment tasks and marking criteria• Peer reviews of student assessments that include your feedback |
| Other | <ul style="list-style-type: none">• Examples of student work that demonstrate achievement of learning outcomes• Examples of innovative assessment tasks• Data/evaluation evidencing impact of assessment approach/innovation (e.g. SoTL)• Adoption of techniques/approaches by others• Recognition from university, national or international peers |

Evaluate & Develop

Evaluation and reflection on practice

Standards:

- **Continued commitment to improving/enhancing their teaching performance and to remedy problems identified with their teaching**
- Willingness to try different or new teaching methods and technologies
- Teaching innovation in curricular design
- Incorporation of teaching innovations into teaching pedagogy

This might look like:

- Systematic collection of feedback from students on teaching practice
- Regular collection of feedback from peers on teaching practice
- Regular informal discussions with peers on teaching practices and approaches
- Self evaluation of teaching practice including reflection on practice in the context of student and peer evaluation
- Discussing rationale for teaching approaches with students as related to how they support learning
- Providing information to students on actions taken (or not) in light of their feedback, including rationale

You might draw this type of evidence from:

- | | |
|----------|--|
| Students | <ul style="list-style-type: none">• Evidence of collecting student learning experience questionnaire outcomes• Evidence of collecting other forms of student feedback (formative, focus groups)• Continued improvement and/or average or above average student feedback on teaching (SLEQ scores as compared to similar courses, focus groups, formative feedback) |
| Peers | <ul style="list-style-type: none">• Evidence of engagement in peer review of teaching (as reviewee and reviewer)• Evidence of learning from conversations with peers |
| Other | <ul style="list-style-type: none">• Teaching portfolio – demonstrating (self) reflective practice• Summaries of SoTL outcomes and/or publications• Applications for teaching awards/grants |

Develop

Continuing Professional Development

Standards:

- **Continued extension of knowledge in their field(s) or discipline(s), with respect to classes, currency of the material and new teaching methods**

This might look like:

- Participation in professional development activities and events
- Undertaking evidence informed teaching strategies, assessment or curricular renewal or development
- Creation or adaptation of learning and teaching resources

You might draw this type of evidence from:

Other

- List of professional development undertaken with changes made in design and/or delivery resulting from participation noted
- Examples of learning resources created/adapted
- Examples of teaching strategies, assessment or curricula modified or developed with rationale for approach
- Examples of leadership of professional development for peers (including peer feedback, if appropriate)

Develop

Integration of scholarship, research &/or professional activities with teaching

Standards:

- Continued extension of knowledge in their field(s) or discipline(s), with respect to classes, currency of the material and new teaching methods
- Continued commitment to improving/enhancing their teaching performance and to remedy problems identified with their teaching
- Extent to which scholarly work is brought into the classroom
- Incorporation of teaching innovations into teaching pedagogy

This might look like:

- Inclusion of appropriate discipline based research in the curriculum
- Undertaking evidence informed teaching strategies, assessment or curricular renewal or development
- Contribution to teaching and learning within or beyond your discipline

You might draw this type of evidence from:

- | | |
|----------|---|
| Students | <ul style="list-style-type: none">• Student learning experience questionnaire outcomes particularly related to impact of research experiences and use of research in the curriculum• Student and alumni testimonials• Other forms of student feedback (formative, focus groups) |
| Peers | <p>Annotated and peer reviewed:</p> <ul style="list-style-type: none">• Syllabi/course materials/assessments demonstrating incorporation of current disciplinary research• Syllabi/course materials/assessments demonstrating incorporation of approaches based on T&L research |
| Other | <ul style="list-style-type: none">• Peer testimonials• An annotated list of one's publications with details on the connection of each to one's teaching• Recognition from university, national or international peers |
